EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lyle Kims on February 24, 2005.

The application has been amended as follows: On page 1 of the specification after line 2 where there is the heading "Linear Motor" put the following sentence on a new line below the heading: __ This application is a continuation of US patent application 09/719,663, which is now US patent 6,653,753, which is a 371 of PCT/JP00/02382, filed on April 12, 2000. __

Allowable Subject Matter

Claims 28-52 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or teach a linear motor having a ring shaped permanent magnet combined with a tubular vibrator made of a magnetic material in combination with the other features of claim 28.

Applicant's information disclosure statement filed 11/24/2004 cites PCT application WO 97/13261. That reference teaches making a tubular vibrator (metallic support sleeve) made of magnetic material in the abstract of the disclosure, but does not teach combining that metallic support with a ring shaped permanent magnet.

Art Unit: 2834

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
